1. INTRODUCTION

1.1 HEALTH INFRASTRUCTURE INFORMATION SYSTEM – VERSION 3 (HIIS3)

The Health Infrastructure Information System – Version 3 (HIIS3) is a computer-based data system designed to support the management of Nepal's public health infrastructure. HIIS3 was designed and developed by *delve* Information System Solution (iS2) for the Ministry of Health and Population (MOHP) under the financial and technical support of the Nepal Health Sector Support Programme (NHSSP) on behalf of the UK government's Department for International Development (DFID).

HIIS3, a web-based system, is an upgrade of version 2 of the Health Infrastructure Information System (HIIS) but which now features a Google Earth interface that allows users to visualise the geographical location of Health Institutions (HIs) and to access additional information.

SN	HIIS (Version 2)	HIIS3 (Version 3)
1.	HIs located by district	HIs located by Village Development
		Committee (VDC)/municipality
2.	HI coverage up to Health Post (HP) level	HI coverage also includes Sub-Health Posts
		(SHPs)
3.	Two primary information components	Three primary information components
	included:	included:
	i. HI and building infrastructure	i. HI and building infrastructure
	ii. Health infrastructure buildings	ii. Health infrastructure buildings
	repair and maintenance plan	repair and maintenance plan
		iii. Procurement Plan
4.	Handles only attribute data (non-spatial)	Geographic-Information-System- (GIS-)
		Map (spatial) interface has been added

HIIS3 has additional capabilities in the following areas:

1.2 FUNCTIONAL CONTEXT

Health infrastructure refers to buildings of different types where health care services are provided and where administration, management, and other supportive functions are carried out.

Health infrastructure management is seen to constitute three principal components:

- Health infrastructure inventory
- Construction or reconstruction of health buildings
- Repair and maintenance of health buildings.

Health Infrastructure Inventory

The health infrastructure inventory of HIIS3 maintains information on HIs and health buildings including: numbers and types of facilities, geographical spread/location, land owned, accessibility, and support facilities available; and other details including: functional use, building construction types, number of storeys, floor area, ground coverage, and design standards followed (old design, new standard design, or integrated design).

Construction or Reconstruction of Health Buildings

New health buildings are constructed and/or old buildings reconstructed as proscribed in MoHP's annual Health Infrastructure Procurement Plan. This plan describes the steps to be followed in accordance with government procurement procedures, including activities such as tender publishing, evaluation, contract awarding, and the handover of completed works to the concerned institution by the Department of Urban Development and Building Construction (DUDBC) under the Ministry of Urban Development. DUDBC is mandated to construct health infrastructure under direction of MoHP's Department of Health Services Management Division.

Alternatively, when the cost of construction work is below the NPR 1 million services can be procured directly by health institutions.

Repair and Maintenance of Health Buildings

Annual repair and maintenance works are carried out by the respective HIs. The repair and maintenance activities are classified in three categories:

- Preventive maintenance
- Minor repair and maintenance
- Major repair and maintenance.

Classification of the repair and maintenance works required is made on the basis of each building's age and physical condition. Buildings older than a specified age and/or where the physical condition is extremely poor are considered for reconstruction.

1.3 CLASSIFICATION OF HEALTH INSTITUTIONS

Health buildings can be classified under the following broad categories:

- Health service facilities
- Logistics and human resource development units
- Management and administrative units.

Health service facilities include such HI types as:

- Central Hospitals (CHs)
- Regional Hospitals (RHs) and Sub-Regional Hospitals (SRHs)
- Zonal Hospitals (ZHs)
- District Hospitals (DHs)
- District Health Offices (DHOs)
- Health Centres (HCs)
- Primary Health Care Centres (PHCCs)

- HPs and SHPs
- Central Public Health Laboratories
- District Public Health Laboratories
- Central Ayurvedic Hospitals
- Zonal Aurvedic Health Clinics/Aushadhalaya
- District Ayurvedic Health Centres (Clinics/Aushadhalaya).

Logistics and human resource development units include:

- Central Medical Stores
- Regional Medical Stores
- District Medical Stores
- Central Health Training Centres
- Regional Health Training Centres
- Health Information, Education, and Communication (IEC) Centres.

Management and administrative units include:

- MoHP
- Departments and central-level offices under MoHP
- Regional Health Directorates (RHDs)
- District (Public) Health Offices (D(P)HOs).

1.4 INFORMATION CONTEXT

HIIS3 maintains data records and information in conformity with the three components of the system, namely:

- HI and health building inventory
- Repair and maintenance requirements
- MoHP's infrastructure procurement plan

In addition, the system also maintains photographs, technical design drawings, and a GIS shapefile layer showing HI locations.

HIs and Health Buildings Inventory Information

The basic information record on HIs and health buildings was collected during an initial survey following which data is collected periodically on new infrastructure built and the maintenance status of existing buildings.

Repair and Maintenance Cost Requirements

The repair and maintenance cost requirements of health buildings are computed by the system based on pre-defined criteria of repair and maintenance activities and repair and construction rates. The computation is based primarily on each building's age, floor area, and physical condition.

Computation of repair and maintenance costs also provides a good indicator of the need reconstruction of a building.

Procurement Plan Information

Once the construction/reconstruction of a building has been approved, a consolidated procurement plan is prepared and recorded in the system. Procurement plans include data on items such as: contract ID, name of HI, procurement works (new building construction, storey addition), procurement procedure to be followed(Government of Nepal (GoN), World Bank (WB)), procurement method (International Competitive Bidding (ICB) or National Competitive Bidding (NCB)), procurement level (central, district), and procurement status ('on tender', 'contracted', 'completed' or handed over).

Procurement Plan Information also includes data on the status of contract implementation by way of a 'percentage completion' indicator.

Photographs and Technical Design Images

Along with basic information on HIs and health buildings, the system also maintains image files of health building photographs and technical design drawings. Photographs of the different construction phases are also reported and maintained to illustrate current construction status.

GIS Shapefiles

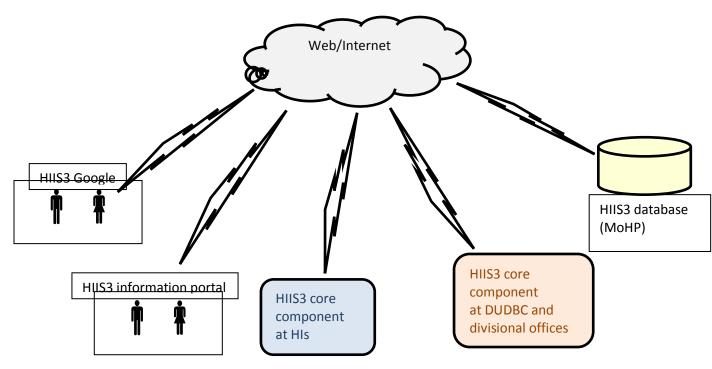

In order to show the geographic spread and distribution of HIs across the country and to allow a visual assessment of health building sites to be made, the system includes a GIS map interface able to locate each His to an extremely high degree of accuracy (normally within 15m). For this purpose, the system uses HIs' point data (GIS shapefiles) created/converted based on HIs' geographic coordinate data acquired through the major GPS survey performed by DoHS's Management Division (MD). To date, the point data of 57 districts is available.

2. <u>SYSTEM OVERVIEW</u>

HIIS3 comprises three subsystems: 1) HIIS3 core component; 2) HIIS3 Google, and 3) HIIS3 information portal. The HIIS3 core component can be operated by concerned users from both the health sector and DUDBC and facilitates information maintenance, retrieval, and processing.

HIIS3 Google is based on a Google Earth Interface where users can locate individual HIs' locations on satellite images, maps and hybrids of the two. The HIIS3 information portal allows users to query general information about HIs and health buildings on the Internet.

The HIIS3 system database is operated from the MoHP's web server, while the application interface of HIIS3 core component is installed at different central-, regional-, and district-level HIs, and at DUDBC. HIIS3 Google and the HIIS3 information portal have a standard internet interface. The system overview is illustrated schematically below.

3. <u>SYSTEM FUNCTIONAL COMPONENTS</u>

HIIS3 has the following functional components:

- Data maintenance
- Information retrieval
- System maintenance.

<u>Data Maintenance</u>

The data maintenance component allows users to maintain the following data:

- HI and building information
- Procurement plans
- Progress made in implementing procurement plans
- Repair and maintenance requirements
- Photographic and design drawing images of each facility.

Information Retrieval

Information retrieval has two sub-components: reports and queries, and data visualisation. The reports and queries sub-component allows users to query information and/or produce various reports (summary, detail) such as those listed below:

- Health infrastructure construction instructions
- Health buildings
- Repair and maintenance requirements
- Reconstruction requirements
- Procurement Plans.

The data visualisation sub-component allows users to visualise data over geographic maps of the country or development regions, and to query information.

System Maintenance

Under this component, users maintain the basic system data required prior to system operation. Such system base data include:

- Type codes
- Repair and maintenance criteria
- Repair and maintenance rates
- System users.

4 HIIS3 DATA RECORDS

4.1 HEALTH INSTITUTION AND BUILDING INVENTORY DATA

HI and building inventory data are comprised of the following elements, which are updated in line with the Health Institutions Survey, direct data acquisition from respective HIs, and/or HI upgrades.

- a. HI information
 - HI ID and name
 - Geographic location (district, VDC, settlement name)
 - HI type
 - Number of hospital beds (service capacity)
 - Name and type of access road
 - Nearest market
 - Availability and type of electricity supply line
 - Type of available water supply source
 - Type of available internet connectivity

Details of support facilities/units

- Details of overhead water tank(s), if they exist
- Details of underground water tank(s) if they exist
- Details of incinerator if it exists
- Details of storage area if it exists
- Details of septic tank if it exists
- Details of soak pit if it exists
- b. HI land information
 - Plot number
 - Area
 - Ownership
- c. Health building information
 - Building block name
 - Year of construction
 - Functional use/purpose
 - Number of storeys

- Total floor area
- General physical condition of building
- General physical condition of building elements
- Specific Condition (problems) of Building elements
- Availability and types of support services and their condition (water supply and drainage, electrical system, plumbing and sanitation, power backup system, water heating system, cooling system).
- -

4.2 PROCUREMENT PLAN DATA

The data elements of a Procurement Plan include the following:

- a. Basic information on:
 - Contract ID
 - HI ID and name
 - Concerned divisional office
 - Fiscal year
 - Works detail
 - Procurement method
 - Procurement procedure
 - Procurement level
- b. Procurement Plan detail
 - Procurement plan stage (plan, revised, actual)
 - Estimated Cost in US dollars and Nepalese Rupees (NPR)
 - Dates when bid document approved, tender published, bids opened, bids evaluated, contract awarded, job completed, and handed over.

The procurement plan data record also includes procurement plan status: 'on tender process', 'contracted', 'completed', or 'handed over'. Initially, the status is recorded as 'on tender process' when the tender is published, and subsequently updated against the trimesterly progress report.

4.3 PROGRESS AND WORK STATUS REPORTING DATA

Progress on construction works is reported tri-mesterly (every four months) by the respective procuring office (DUDBC/divisional office or concerned HI). The data contents of the tri-mesterly progress report are as follows:

- Reporting period
- Allocated budget
- Authorised budget
- Released amount
- Expended amount
- Physical status level
- Physical progress percentage.

4.4 REPAIR AND MAINTENANCE DATA

Data on health buildings' physical status are updated in accordance with reports issued annually by the respective HIs. Based upon physical status data, the buildings' annual repair and maintenance requirements are determined, budgeted and planned accordingly. Data updated concerning repair and maintenance of buildings includes the following:

- General physical condition of the building
- General physical condition of building elements
- Specific condition (problems) of building elements
- Availability and types of support services and their condition (water supply and drainage, electrical system, plumbing and sanitation, power backup system, water heating system, cooling system).

5. <u>REPORTS AND QUERIES</u>

HIIS3 features various reports and queries to allow information retrieval relating to all three information domains of the system (HIs and building inventory, repair and maintenance requirements, procurement plan).

The system allows information retrieval grouped by selected parameter and filtered by given criteria. The parameter groups are:

- Ecological zone
- Development region
- District
- HI type
- DUDBC division office.

Similarly, the filter criteria include the following parameters:

- Ecological zone
- Development region
- District
- HI type
- DUDBC division office
- Project fiscal year.

HIIS3 reports and queries include lists/details, counts/summaries, and specific reports relating to different information domain and cross-domain (comparative) reports.

- HI
- Health buildings
- Repair and maintenance requirements
- Required reconstruction requirements
- Procurement Plan
- Density of HIs
- HIs (buildings) by design standard
- Reconstruction requirements and Procurement Plan
- HIs (buildings) by design standard and Procurement Plan

- HP with or without birthing unit
- PHCC with or without Basic Emergency Obstetric Care (BEOC)
- DH with or without Comprehensive Emergency Obstetric Care (CEOC).

a. <u>HI Report</u>

HI reports (summary/list) can be produced by ecological zone, development region, district, and HI type, containing the following data items:

Summary Report

- HI count
- Land area
- Building count
- Ground coverage
- Total floor area of buildings

List Report

- HI name
- Location
- Land area
- Building count
- Ground coverage
- Total floor area of buildings.

b. <u>Health Building Report</u>

Health Building reports can be produced by ecological zone, development region, district, and HI type, containing the following data items:

- Building block name
- Year of construction
- Land plot number
- Number of storeys
- Ground coverage
- Floor area
- Ownership
- Condition.

c. <u>Repair and Maintenance Requirement Report</u>

Repair and Maintenance Requirement Reports (summaries/lists) can be produced by ecological zone, development region, district, and HI type, containing the following data items:

Summary Report

- Estimated cost for:
 - Preventive maintenance
 - Minor repair and maintenance
 - Major repair and maintenance
 - Reconstruction

<u>List Report</u>

- HI name
- Estimated cost for:
 - Preventive maintenance
 - Minor repair and maintenance
 - Major repair and maintenance
 - Reconstruction.

d. <u>Procurement Plan Report</u>

Procurement Plan reports (summaries/lists) can be produced by ecological zone, development region, district, HI type, DUDBC divisional office, or procuring HI, containing the following data items:

Summary Report

- Procurement Plan count
 - Count of Procurement Plan at different stages of procurement status
 - On tender
 - Contract
 - Finished
 - Handed over

List Report

- HI name
- Contract ID
- Procurement status
 - On tender
 - Contract
 - Finished
 - Handed over.

e. <u>Health Building Design</u>

Health building design reports (summaries/lists) can be produced by ecological zone, development region, district, and HI type, containing the following data items:

Summary Report

- Total count of HIs
- Count of old designs with no birthing units
- Count of old designs with birthing units added
- Count of standard designs with no birthing units
- Count of standard designs with birthing units added
- Count of integrated design buildings

<u>List Report</u>

- Group by design type
 - Integrated Design
 - HI name
 - Ground coverage
 - Land area of respective HI

Standard Design with Birthing Unit Added

- HI name
- Ground coverage
- Land area of respective HI

Standard Design with No Birthing Unit

- HI name
- Ground coverage
- Land area of respective HI

Old Design with Birthing Unit Added

- HI name
- Ground coverage
- Land area of respective HI

Old Design with No Birthing Unit

- HI name
- Ground coverage
- Land area of respective HI.

f. <u>Procurement Plan Detail</u>

Procurement plan detail reports list all procurements for a given ecological zone, development region, district, HI type, or DUDBC divisional/procuring HI. These reports contain the following data items:

- Contract ID
- HI name
- Fiscal year project started
- Procurement procedure
- Procurement method
- Procurement level
- Procurement status indicator (on tender, contract, finished, handed over)
- Procurement process detail
 - Initial plan/revision/actual indicator
 - Planned and actual dates of bid document approval
 - Planned and actual dates of bid evaluation
 - Planned and actual dates of bid approval
 - Planned and actual dates of contract
 - Planned and actual dates of completion
 - Planned and actual dates of hand over
 - Specific remarks, if any.

g. <u>Reconstruction Requirements List</u>

Reconstruction requirements list reports document all HIs, with the number of buildings requiring reconstruction for a given ecological zone, development region, district, or HI type grouped by district and HI types.

h. <u>District-/Local-level HIs with or without birthing units by district</u>

This report lists all HIs, grouped by district and HI type, which have buildings of the following design standards, with or without birthing units:

- HI name
- Number of old design buildings with birthing unit added
- Number of old design buildings with no birthing unit
- Number of standard design buildings with birthing unit added
- Number of standard design buildings with no birthing unit
- Number of integrated design buildings.

i. District-/local-level HIs with or without birthing units by HI type

This report lists all HIs, grouped by HI type and district, which have buildings of the following design standards, with or without birthing units.

- HI name
- Number of old design buildings with birthing unit added
- Number of old design buildings with no birthing unit
- Number of standard design buildings with birthing unit added
- Number of standard design buildings with no birthing unit
- Number of integrated design buildings.

j. Individual HI Detail Query

This query provides information on individual HIs: users can retrieve and visualise every detail of the selected HI and/or health building, including photographs and drawing images.

k. <u>Standard Design Drawing of Health Buildings</u>

The standard design drawings of health buildings allow users to view design drawings for a given HI type and ecological zone and so check that facilities constructed conform with standard designs.

6. <u>SYSTEM MAINTENANCE</u>

The system maintenance component of the system allows users to update and maintain base data. System base data must be defined prior to the installation and operation of the system. System base data include the following:

- Type codes
- Repair and maintenance plans and criteria
- Repair and maintenance rates
- Health building design standards
- HIIS3 users.

6.1 TYPE CODES

HIIS3 Type Codes include the following:

- HI types
- Building structure types
- Function/use/purpose of health buildings
- Land/building ownership types
- Land area unit types
- Road types
- Electric power supply line types
- Incinerator types
- Building/building elements physical condition types
- Building elements physical condition types
- Temperature cooling system types
- Water tank types
- Water heating systems
- Source of water supply
- Procurement method
- Procurement level
- Procurement procedure
- Construction works status level
- Procurement Plan status.

HI Types:

SN	HI Classification	HI Types
Α.	Government HIs	
1.	Health Care Service Units	Central Hospital (CH)
2.		Regional Hospital (RH)
3.		Sub-regional Hospital (SRH)
4.		Zonal Hospital (ZH)
5.		District Hospital (DH)
6.		Health Centre (HC)
7.		Primary Health Care Centre (PHCC)
8.		Health Post (HP)
9.		Sub Health Post (SHP)
10.		Medical College/Teaching Hospital (TH)
11.	Diagnostic and other Services Units	Radiology and Pathology Laboratory
12.		Pharmacy

13.	Ayurvedic Health Care Service Units	Central Ayurveda Hospital
14.		Zonal Ayurved Aushadhalaya (Pharmacy)
15.		District Ayurved Health Centres
16.		Ayurved Aushadhalaya (Clinics)
17.		Other Ayurved His
18.	Human Resource Development	Central Health Training Centres
19.	Logistics and other Support Units	Regional Health Training Centres
20.		Medical Stores
21.		Drug Management Offices
22.	Management and Administration	Sector Ministry
23.		Departments and Central-level Offices
24.		Regional-level Offices
25.		District-level Offices
В.	Non-government HIs	
26.	Health Care Service Units	NGO/INGO Hospitals
27.		Mission Hospitals
28.		Private Hospitals and Nursing Homes
29.		Private Clinics and Polyclinics
30.	Diagnostics and other Support	Pathology and Radiology Centres
31.	<u>Service Units</u>	Private Pharmacy

Building Structure Types:

SN	Types
1.	Reinforced Cement Concrete (RCC) Frame Structure
2.	Brick/Stone Masonry (BSM) in Cement Mortar with RCC Roof
3.	BSM in Cement Mortar with Corrugated Galvanised Iron (CGI) /Asbestos Roof
4.	BSM in Mud Mortar with CGI/Asbestos Roof
5.	BSM in Cement Mortar with Tile/Slate Roof
6.	BSM in Mud Mortar with Tile/Slate Roof
7.	Other/Known Type

Functional Use/Purpose of Health Buildings:

SN	Classification	Types
1.	Main Building	Main Health Care Service Building
2.		Main Management and Administrative Building
3.	Outpatient Department (OPD) Clinic	Dental Clinic
4.		Directly Observed Treatment Short Course (DOTS) Clinic
5.		Expanded Programme on Immunization (EPI)/Maternal and Child Health (MCH)/Family Planning (FP) Clinics
6.		Eye Clinic
SN	Classification	Types
7.	OPD Clinic	HIV Clinic
8.		Medical Clinic
9.		Obs/Gyn Clinic
10.		Pediatric Clinic
11.		Surgical Clinic
12.	Emergency	Emergency Unit
13.	Inpatient Department	Inpatient Wards
14.	Birthing units	Birthing Unit (HP)
15.		BEOC (PHCC)
16.		CEOC (DH)
17.	Specialised Units	Central Sterile Supply Department (CSSD)
13.		Intensive Care Unit (ICU)
14.		Comprehensive Abortion Care (CAC)
15.		Trauma Centres
16.	Staff Quarters	One Family Staff Quarter
17.		Two Family Staff Quarter
18.		Three Family Staff Quarter
19.		Four Family Staff Quarter

r		
20.	Doctors' Quarters	One Family Doctors Quarter
21.		Two Family Doctors Quarter
22.		Three Family Doctors Quarter
23.		Four Family Doctors Quarter
24.	Nurses' Quarters	One Family Nurse Quarter
25.		Two Family Nurse Quarter
26.		Three Family Nurse Quarter
27.		Four Family Nurse Quarter
28.	Auxiliary Nurse Midwives' (ANMs')	ANM Quarter
	<u>Quarters</u>	
29.	Operation Theatre (OT)	ОТ
30.	Other Support Units	Training Centres
31		Mortuary and Post-mortem
32.		Medical Store
33.		General Store
34.		Toilet
35.		Waiting Area
36.		Kitchen

Land/Building Ownership Types:

SN	Туреѕ
1.	Owned
2.	Rented
3.	VDC/ District Development Committee (DDC) of other Community Buildings

Land Area Unit Types:

SN	Туреѕ
1.	Ropani
2.	Bigha
3.	Square Feet
4.	Square Metres

Road Types:

SN	Types
1.	Highway
2.	Main Road
3.	Side Road

Electric Power Supply Line Types:

SN	Types
1.	Not Available
2.	National Grid
3.	Solar or other Reusable Energy
4.	Local Hydroelectric Power

Incinerator Types:

SN	Туреѕ
1.	Not Available
2.	Manual
3.	Electric

Building/Building Elements Physical Condition Types:

SN	Types
1.	Not Applicable
2.	Good
3.	Medium
4.	Poor
5.	Very Poor

Building Elements Problem Types:

SN	Types
1.	Not Applicable
2.	Cracks
3.	Broken
4.	Leakage
5.	Seepage
6.	Settlements
7.	Broken Locks/Hinges/etc.

Temperature Cooling System Types:

SN	Туреѕ
1.	Not Applicable
2.	Air Conditioning
3.	Refrigeration
4.	Central Cooling System
5.	Refrigerated Containers
6.	Others

Water Tank Types:

SN	Туреѕ
1.	Not Applicable
2.	RCC
3.	PCC
4.	Galvanised Iron (GI) Sheet

Water Heating Systems:

SN	Туреѕ
1.	Not Applicable
2.	Electrical Geysers
3.	Solar Panel System
4.	Central Steam System

Source of Water Supply:

SN	Туреѕ
1.	Not Applicable
2.	Piped Water Supply
3.	Stream/Pond
4.	Ground Water (Boring/Hand Pump)

Procurement Method:

SN	Types
1.	NCB
2.	ICB

Procurement Level:

SN	Types
1.	Central
2.	District

Procurement Procedure:

SN	Туреѕ
1.	GoN
2.	WB

Construction Works Status Level:

SN	Types
1.	Site Clearance and Foundation Digging
2.	Foundation Laying
3.	Damp Proof Course (DPC)Works
4.	Work in Sill Level
5.	Work in Lintel Level
6.	Work in Slab/Roof Level
7.	Electric Works

8.	Plumbing Works
9.	Plaster Works
10.	Painting Works
11.	Works Completed

Procurement Plan Status:

SN	Types
1.	Planned (P)
2.	Revised (R)
3.	Actual (A)

6.2 REPAIR AND MAINTENANCE PLAN AND CRITERIA

The repair and maintenance of health buildings is planned and implemented each year, based on the physical status reported by the respective HIs. Health building repair and maintenance plans prescribe preventive maintenance, minor repair and maintenance, or major repair and maintenance, depending upon the buildings' physical status and age.

Preventive maintenance is planned and budgeted for all buildings older than two years (since completion) whose physical condition is good. Buildings which are not in good physical condition also require repair and maintenance, either minor repair and maintenance or major repair and maintenance.

Buildings which are more than fifty years old, or whose physical condition is very poor overall, require reconstruction.

The following table illustrates the repair and maintenance plans defined based on a building's condition and age.

SN	Repair and Maintenance Plan	Building Condition	Building Age	
1.	Preventive Maintenance	Good	> 2 years	
2.	Minor Repair and Maintenance	Medium ≤ 50 yea		
3.		Medium	> 50 years	
	Major Repair and Maintenance	Poor	≤ 50 years	
	Descustion	Poor	> 50 years	
4.	Reconstruction	Very Poor	-	

6.3 REPAIR AND MAINTENANCE RATES

For each repair and maintenance plan (including reconstruction), the required budget/cost is calculated on the basis of a predefined standard rate and set procedure. Repair and maintenance and reconstruction costs are based on the area and volume of given building elements and are calculated on the basis of predefined rates. Such predefined rates vary according to the use or purpose of buildings and the type of repair and maintenance plan.

All health care service facilities are further categorised as specialised buildings or general buildings. Health care service units are defined as specialised buildings, while general buildings include administrative, management, training, and logistics support units.

	Repair and Maintenance Plan	Rates
1.	Preventive Maintenance	2% of the building construction cost
2.	Minor Repair and Maintenance	3% of the building construction cost
3.	Major Repair and Maintenance	
	(Corrective)	
	Door and Windows	NPR 4,000/sq ft
	Wall	NPR 350/cu ft
	Roof	NPR 250/sq ft
	Slab	NPR 350/sq ft
	Floor	NPR 250/sq ft
	Support Facilities	
	Facility Condition : Poor	0.02% of the building construction cost
	Facility Condition : Very Poor	0.06% of the building construction cost
		i. Water Supply and Drainage
		ii. Electricity
		iii. Plumbing and Sanitation
		iv. Power Backup System
	Support Facilities	v. Cold Chain/Store
		vi. Steam System
		vii. Waste Pit
		viii. Placenta Pit
		ix. Incinerator
4.	Building Construction Cost	
	i. General Buildings	NPR 3,500/sq ft
	ii. Specialised Buildings	NPR 4,500/sq ft

6.4 HEALTH BUILDING DESIGN STANDARDS

Health Building Design Standards

Recently, standard building designs have been defined by NHSSP for selected HI types. The defined building designs for health buildings are listed below:

SN	НІ Туре	Ecological Zone	Type/ Option	Design Detail
1.	HP	Mountain		Load-bearing/Stone Wall/2 Storeys

6.5 HIIS USERS

HIIS users are classified into the following categories:

- System administrator
- Management
- Planning
- Data Maintenance.

The System Administrator has full authority to operate HIIS3 with respect to information maintenance, information retrieval, and defining system base data. Users belonging to the management group can retrieve information (reports and queries) of all kinds but cannot enter or edit information. Planning users can retrieve information (reports and queries) of all kinds as well as define/change repair and maintenance criteria and rates. Those in the data maintenance group can perform data entry and edit information.
